Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to an endoscope with two observation optical systems and means for adjusting both, classified in class 600, subclass 173.
 - II. Claims 10-16, drawn to an endoscope with two observation optical systems with a common input, classified in class 600, subclass 176.
 - III. Claims 17-19, drawn to an endoscope with a scanning optical system, classified in class 250, subclass 201.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I through III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are structurally different as shown by the differences between Figures 3, 16 and 24, making them unusable in a single combination. Each invention has a different mode of operation, different function and different effects as evidence by the above mentioned different structure.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for any one group is not inclusively required for another, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
